SUMMARY

Full-Stack Developer skilled in TypeScript, React, Next.js, Node.js, and Python, with experience building and deploying full-stack web and mobile applications. Experienced across frontend development, REST APIs, databases, authentication, third-party integrations, and deployment workflows. Focused on building clean, maintainable, responsive applications and shipping reliable software for real-world use.

EDUCATION

Our Lady of Fatima University

Bachelor of Science in Computer Science

GPA: 3.7 / 4.0 (Converted from Philippine GWA: 1.7)

Aug 2022 – Aug 2026

Valenzuela City

EXPERIENCE

FilPass Tamperproof Tech Inc

Full Stack Developer Intern

Feb 2026 – May 2026

Philippines

- Built a production-ready landing page using Next.js, React, and Tailwind CSS to generate service inquiries and improve client credibility online.
- Applied SEO best practices (meta tags, structured data, Core Web Vitals) achieving a 98% Lighthouse score on mobile and strong page indexing potential.
- Prepared deployment pipeline with Vercel and maintained clean, scalable code using Git/GitHub version control.

PROJECTS

NutriTakes | React Native (expo), TensorFlow Lite, OpenAI, Supabase, Node.js

- Spearheaded a 4-member thesis project to build a full-stack mobile app that identifies food items using AI-powered computer vision and provides real-time calorie estimates and nutrition insights.
- Integrated TensorFlow Lite with ~70% detection accuracy across multiple food categories for on-device ML execution.
- Implemented secure Supabase authentication, database storage, and user food history tracking.

StockQer | Next.js, TypeScript, Tailwind CSS, Inngest, MongoDB Atlas, Finnhub API

- Built a full-stack financial dashboard with real-time stock tracking, personalized watchlists, and market news integration.
- Integrated Finnhub API and event-driven workflows using Inngest for live price updates and automated data refresh.
- Implemented secure authentication and responsive UI, ensuring fast performance and a seamless experience across devices.

Luci-Moto | HTML/CSS, JavaScript, MySQL

- Spearheaded a 4-member team to develop a full-stack e-commerce site with product listings, cart functionality, and secure checkout, enhancing user shopping experience and streamlining inventory management.
- Contributed to implementing real-time inventory tracking and mobile-friendly design for local buyers.

EN-Construction | React, Tailwind CSS, Node.js, Express, Framer Motion,

- Developed a custom business website for a construction company, showcasing services, completed projects, and contact options.
- Applied SEO and performance best practices, achieving a 98% Lighthouse mobile performance score while optimizing the website for responsiveness and search visibility.

Certifications

Cisco Networking Academy – PCAP: Programming Essentials in Python (Issued 2025)

freeCodeCamp – Responsive Web Design Certification, JavaScript Algorithms & Data Structures, Front End Development Libraries

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6), TypeScript, HTML/CSS, PHP, Python

Frameworks and Libraries: Next.js, Angular, React, Node.js, Express

Technologies and Tools: Git, GitHub, GitLab, Supabase, Inngest

Software and Design: Visual Studio Code, Figma, Microsoft Office, Adobe Creative Suite, Blender
